EDUCATION

University of Southern Maine, Portland, ME. May 2026 BA Environmental Planning and Policy
Undergraduate Research Opportunity Program Fellow, 2025
University of North Carolina, Greensboro, NC. May 2020 BFA Sculpture & Ceramics

RESEARCH EXPERIENCE

Undergraduate Research Assistant

University of Southern Maine Aquatic (Dr. Karen Wilson)
September 2023- January 2025

- Conducted stomach content analysis of juvenile alewife (*Alosa pseudoharengus*) and American shad (*Alosa sapidissima*)
- Processed biological specimens for ecological research
- Assisted with data management and quality control procedures
- Prepared laboratory equipment and samples for aquatic ecology projects
- Collaborated with Maine Department of Marine Resources monitoring efforts
- Contributed to research investigating habitat use and feeding ecology of anadromous fishes

FIELD EXPERIENCE

Salt Marsh Restoration Intern

Rachel Carson National Wildlife Refuge, US Fish and Wildlife Service
Spring 2025

- Assisted with salt marsh restoration monitoring
- Conducted wildlife surveys
- Collected ecological field data to support permitting efforts
- Utilized GIS for mapping and documentation
- Assisted with New England Cottontail habitat restoration and coastal conservation activities
- Installed and monitored shorebird protection equipment

TECHNICAL SKILLS

Field methods: Wildlife monitoring, habitat assessment, ecological field surveys, biological sample collection

Laboratory methods: Stomach content analysis, specimen preparation, microscope operation, sample processing

Software: ArcGIS Pro (basic proficiency), Microsoft Excel, Microsoft Office Suite

RELEVANT COURSEWORK

Ecology - Environmental Regulations - Environmental Science - Statistics - Natural Resource Policy - Environmental Communication

ORAL PRESENTATIONS

Diet Analysis of Juvenile Alosa pseudoharengus (Alewife) and Alosa sapidissima (Shad) in Merrymeeting Bay.
Bishop, P. Thinking Matters Symposium, Portland, ME. **April 2025.**

POSTER PRESENTATIONS

Juvenile Alosine Ecology in the Kennebec River: Insights from Diet, Stable Isotopes, and Otolith Analyses.
Bishop, P., Bookman, D., Beasley C., et al. Maine Soil and Water Conference, Augusta, ME. **March 2025**

AWARDS

- Undergraduate Research Opportunity Program Fellowship, *University of Southern Maine*, 2025
